Correction: Do prescription rates of psychotropic drugs change over three years from nursing home admission?

Enrico Callegari^{1,2*}, Jūratė Šaltytė Benth^{3,4,5}, Geir Selbæk^{2,6,7}, Cato Grønnerød^{1,8} and Sverre Bergh^{4,6}

BMC Geriatrics (2021) 21:496

<https://doi.org/10.1186/s12877-021-02437-x>

After publication of this article [1], the authors detected an error in the analyses: the prevalence for antipsychotics in people with dementia should be between 11.7% and 20.8%, and not between 11.7% and 20.7%, as stated in the original article. The reported descriptive incidence and deprescribing rates for psychotropic drugs were also revised. This caused corrections in the abstract, Table 2, Fig. 3 and the Discussion section to be made.

The original article [1] has been corrected.
